▲ The solution for small size products

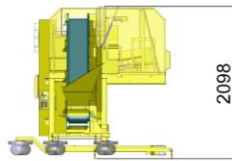

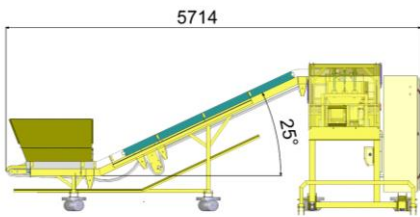

Vendée Concept offers a solution for small size product batching too, which allows the putting of small food products into food batches.

The screw linear weigher CALIBRA ML has been created for the calibration of delicates, small sized and sticky products. Its objective is to batch constant weight doses before transferring the batch to the loading area of the thermoformer.

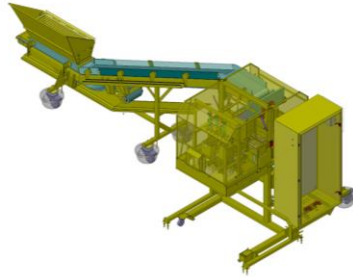

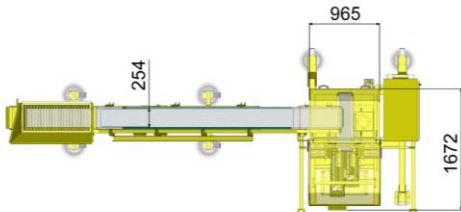

▲ Specifications

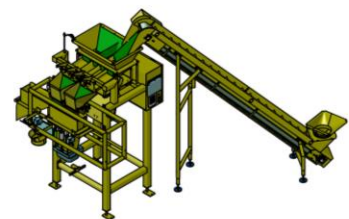

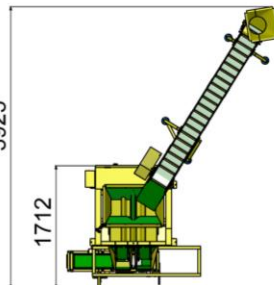

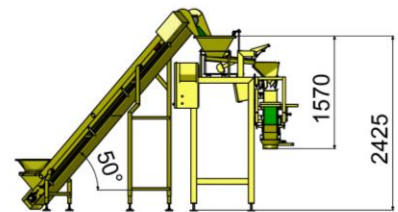

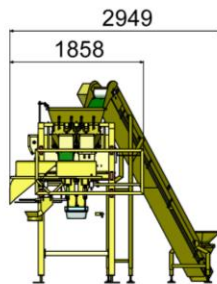

MODEL	Batch	Up to 3 kg/6lb 9.82oz
	Output	Up to 1 800 batches/hour in function of the product
	Closing system	Automatic trap for the bucket closing
